

Pascal Aurèle ELOUMOU

ANALYTICS & DATA ENGINEER (GCP & SNOWFLAKE)

10+ years of experience

eloumou86@gmail.com [+33 6 10 43 66 35](tel:+33610436635) linkedin.com/in/aureleloumou github.com/aurelehawk [Portfolio](#) [Paris, France](#)

PROFESSIONAL PROFILE

I design and industrialize data pipelines based on robust and scalable modern architectures. Mastering complex orchestration (Airflow/Composer) and transformation (dbt), I apply DataOps principles and continuous optimization (FinOps) to ensure reliability and performance at scale. Business-oriented, I simplify developed solutions and support business teams in data utilization.

TECHNICAL SKILLS

Cloud & Data Platforms

- GCP (BigQuery, GCS, Cloud Functions, Dataflow, Pub/Sub, IAM)
- Snowflake (Snowpipe, Time Travel, Zero-Copy Cloning)
- Dataiku DSS
- AWS (S3, Lambda)

Languages & Scripting

- SQL (Window Functions, CTEs, Optimization)
- Python (Pandas, Polars, Scripting)
- Bash / Shell
- JavaScript (Basics)

BI & Data Science

- Power BI, Looker Studio
- Dataiku DSS
- Machine Learning (Random Forest, NLP)
- Excel (Pivot Tables, Advanced Functions, VBA)

Orchestration & Engineering

- Cloud Composer (Managed Airflow) & Complex DAGs
- dbt (Data Build Tool) - Modeling & Testing
- Talend
- Batch & Streaming Ingestion (SFTP, API)

DataOps & Infrastructure

- CI/CD (GitLab CI, GitHub Actions)
- Docker
- Data Quality & Observability
- FinOps (Cloud Cost Optimization)

PROFESSIONAL EXPERIENCE

Data Engineer / Data Developer

BPCE SI

February 2026 – Present

Supporting banking business lines on data usages and valorization in a decision-making environment focused on Client Knowledge (Retail/Credits/Payment Methods).

- ✓ Designed, developed, and industrialized data pipelines (ETL/ELT) to populate decision-making Datamarts (Equinox Retail monitoring).
- ✓ Integrated complex multi-source data streams and transformed massive datasets using GCP BigQuery and Teradata.
- ✓ Orchestrated data workflows via Semarchy Studio (Stambia) and the OPC3 scheduling tool.
- ✓ Ensured data quality and secure file transfers utilizing GCL and WinSCP.
- ✓ Managed production monitoring and resolved Level 2/3 production incidents to guarantee system availability.
- ✓ Collaborated with banking business teams to gather requirements and provide functional and technical support.

Technologies: Semarchy Studio (Stambia), GCP (BigQuery), OPC3, Teradata, GCL, WinSCP, SQL, Power BI, Agile Methodologies (Scrum, Kanban).

Data Analyst & Data Engineer

Manpower

November 2024 – January 2026

Migration from Legacy architecture to Modern Data Stack (Snowflake) and support for business teams in data valorization.

- ✓ Led migration of Alteryx ETL workflows to native Snowflake architecture (ELT), improving performance and maintainability.
- ✓ Developed interactive "DataApps" (Streamlit) and integrated NLP modules for sentiment analysis (qualitative scoring) and quantitative (NTSCORE).
- ✓ Optimized budget models and marketing targeting through predictive algorithms.
- ✓ Data Governance: Strict management of sensitive data flows (GDPR, Banking & HR Data).

Technologies: Python, Snowflake, SQL, dbt, Streamlit, Power BI, Alteryx, Excel (Pivot Tables, Advanced Functions, VBA).

Data Engineer / Data Analyst (GCP)

Carrefour Administratif France

September 2023 – November 2024

Optimization of critical tax pipelines and automation of financial processing on Google Cloud Platform.

- ✓ Architecture & Orchestration: Pipeline automation via Cloud Composer (Airflow) and Cloud Functions for idempotent file processing.
- ✓ BigQuery Engineering: Centralization of financial data, implementation of Partitioning/Clustering strategies to reduce scan costs (FinOps).
- ✓ Productivity gain: Reduced processing time from 4 hours to a few minutes through automation of manual tasks.
- ✓ Implemented monitoring, alerting, and automatic recovery procedures (Backfill) on critical flows.
- ✓ Infrastructure as Code: Use of Terraform for automatic, modular, and reusable deployment in GCP. Granular IAM access management at the datasets level.

Technologies: GCP (BigQuery, GCS, Composer), Terraform, Python, SQL, Looker Studio, Docker, GitLab CI/CD.

Data Analyst

Eneo The Energy of Cameroon

September 2021 – July 2023

Managed a Data & Reporting team for operational performance management and fraud prevention through CRM data analysis.

- ✓ Analyzed Salesforce data to correlate HR resource alignment with Quality of Service (QoS).
- ✓ Fraud detection and reduction of non-technical losses through cross-referencing metering data (Pre/Post-payment).
- ✓ Implemented interactive dashboards for tracking performance indicators (KPIs).
- ✓ Reporting and communication of results to stakeholders through weekly presentations.

Technologies: Python, Power BI, Salesforce, SQL, Excel.

Data Analyst & Equipment Management

NGE

August 2019 – July 2021

Support for equipment engineering and logistics teams in data valorization for the Nachtigal hydroelectric dam construction project, equipment budget and lease management.

- ✓ Defined maintenance budget and tracked expenses.
- ✓ Optimized spare parts inventory and reduced maintenance costs.
- ✓ Implemented a DataApp for equipment management.
- ✓ Reporting and sharing of critical results to stakeholders through weekly presentations.

Technologies: Python, SQL, PostgreSQL, Power BI, Excel.

Data Analyst & IoT (Dataiku)

Vinci Construction

July 2015 – July 2019

Predictive maintenance and large-scale connected fleet management (IoT).

- ✓ Industrialized IoT flows (OBD, CANBUS) and external data (Weather, SAP) via Dataiku DSS.
- ✓ Built and fed data models for predictive maintenance of equipment.
- ✓ Reporting and sharing of critical results to stakeholders through weekly presentations.

Technologies: Dataiku DSS, Python, SQL, PostgreSQL, Power BI, IoT, Excel (Pivot Tables, Advanced Functions, VBA).

PERSONAL PROJECTS

FinOps Kubernetes Project (Airbnb Clone)

Transformation of a monolithic application into a containerized micro-services architecture. Implementation of Kubecost and Prometheus for cost and resource monitoring.

Technologies: Kubernetes, Docker, Grafana, Kubecost.

AI Race Analyzer (GenAI)

Real-time video analysis application leveraging Google Gemini 2.0 Flash multimodal capabilities.

Technologies: Python, Streamlit, OpenCV, Gemini API.

Dallos Analysis (NLP Pipeline)

Message-oriented architecture for automated customer complaint processing: AI Customer Service Agent (Sentiment analysis and response suggestions, then escalation to human agent if necessary).

Technologies: Python, RabbitMQ, Celery, Ollama (Local LLM), MongoDB.

EDUCATION

Master 2 Data & AI

HETIC Paris

2024-2025

Master 1 Digital and Data Science

ESLSCA Paris

2023-2024

Professional Bachelor's Degree in Transport and Customs Procedures

University of Douala

2020-2021

Professional Bachelor's Degree in Systems and Networks

African Institute of Computer Science

2010-2011

CERTIFICATIONS

- 🏆 Dataiku MLOps Practitioner (2025)
- 🏆 Dataiku Machine Learning Practitioner (2024)
- 🏆 Dataiku Advanced Core Designer (2024)
- 🏆 Dataiku Core Designer (2024)

LANGUAGES & SOFT SKILLS

Languages

-  English - C1 (Proficient)
-  French - Native

Soft Skills

- ◆ Autonomy & Initiative
- ◆ Business Vision
- ◆ Teaching & Knowledge Transfer
- ◆ Agile Project Management
